Model : No. 0281/IV/12

Airliner Series

Boeing B-747-200 / Vc25

Air Force One

This model is the first release of Boeing B-747 series in Airliner category, there will be other livery in the future, just like Airbus series. As far as I know there is no paper model of VC-25 Air Force One around in the internet in medium detail level, that is one of the reason why I created this template. This model also the first model that I made for free that is using former inside its fuselage. I use 1:144 scale, the length of the completed model will be 49 cm. I also add display stand patterns along with its former to add strength. I recommend to use 160 gsm plain paper for all parts.
